

MBIA Inc. Full Year and Fourth Quarter 2024 Financial Results

February 27, 2025

MBIA Inc. (NYSE:MBI) (the Company) today reported a consolidated GAAP net loss of \$447 million, or \$(9.43) per diluted common share, for 2024 compared to a consolidated GAAP net loss of \$491 million, or \$(10.18) per diluted common share, for 2023. The lower net loss for 2024 primarily resulted from reduced net realized investment losses at National Public Finance Guarantee Corporation (National), modest net realized investment gains in 2024 versus net losses in 2023 resulting from the sale of securities associated with the termination of interest rate swaps at the Corporate Segment, lower losses related to the termination and deconsolidation of insured variable interest entities at MBIA Insurance Corporation (MBIA Corp.) and lower operating expenses. These favorable results were partially offset by a fair value loss on recoveries of paid insurance claims associated with Zohar CDOs insured by MBIA Corp., reduced net investment income at National and MBIA Corp. and greater losses and loss adjustment expenses (LAE) at National.

Book value per share was negative \$40.99 as of December 31, 2024 compared with negative \$32.56 as of December 31, 2023. The decrease in book value per share was primarily due to the consolidated net loss for 2024.

The Company also reported an Adjusted Net Loss (a non-GAAP measure defined in the attached Explanation of Non-GAAP Financial Measures) of \$184 million or \$(3.90) per diluted common share for 2024 compared with an Adjusted Net Loss of \$169 million or \$(3.49) per diluted common share for 2023. The greater Adjusted Net Loss for 2024 was primarily due to National's lower net investment income and greater losses and LAE, largely related to its Puerto Rico exposure, which were partially offset by lower Corporate Segment operating expenses mainly due to reduced compensation costs in 2024.

Adjusted Net Income (Loss) provides investors with views of the Company's operating results that management uses in measuring financial performance. Reconciliations of Adjusted Net Income (Loss) to net income, calculated in accordance with GAAP, are also attached.

Fourth Quarter Results

The Company recorded a consolidated GAAP net loss of \$51 million, or \$(1.07) per diluted common share, for the fourth quarter of 2024 compared with a consolidated net loss of \$138 million, or \$(2.94) per diluted common share, for the fourth quarter of 2023. The lower net loss for the fourth quarter of 2024 was primarily due to lower net realized investment losses for National and the Corporate segment, a favorable variance on foreign exchange related gains/losses on the MBIA Global Funding medium term notes and an absence of net losses on derivatives in 2024 versus 2023

net losses related to the termination of interest rate swaps at the Corporate Segment and lower operating expenses mainly due to lower compensation costs in 2024.

The Company reported an Adjusted Net Loss for the fourth quarter of 2024 of \$22 million or \$(0.48) per share compared with an Adjusted Net Loss of \$8 million or \$(0.16) per share for the fourth quarter of 2023. The greater Adjusted Net Loss for 2024 was primarily due to National's greater losses and LAE, largely related to its Puerto Rico exposure, and lower net investment income, partially offset by lower Corporate Segment operating expenses mainly due to lower compensation costs in 2024.

MBIA Inc.

As of December 31, 2024, MBIA Inc.'s liquidity position totaled \$380 million, consisting primarily of cash and cash equivalents and other liquid invested assets. During the fourth quarter of 2024, National declared and paid a \$69 million as-of-right dividend to MBIA Inc. There were no purchases of MBIA shares during the quarter. As of February 20, 2025, there was \$71 million of remaining capacity under the Company's share repurchase authorization and 51.0 million of the Company's common shares outstanding.

National Public Guarantee Financial Corporation

National had statutory capital of \$0.9 billion and claims-paying resources totaling \$1.5 billion as of December 31, 2024. National's total fixed income investments plus cash and cash equivalents had a book/adjusted carrying value of \$1.2 billion as of December 31, 2024. National's insured portfolio declined by \$0.6 billion for the fourth quarter and \$3.1 billion for the year, with \$25.3 billion of gross par outstanding at December 31, 2024. National ended the year with an insured leverage ratio of gross par to statutory capital of 28 to 1, up from 25 to 1 at year-end 2023.

MBIA Insurance Corporation

The statutory capital of MBIA Corp. as of December 31, 2024 was \$88 million and claims-paying resources totaled \$356 million. As of December 31, 2024, MBIA Insurance Corporation's total fixed income investments plus cash and cash equivalents had a book/adjusted carrying value of \$154 million. MBIA Corp. ended 2024 with total gross par insured of \$2.3 billion versus \$2.9 billion at year-end 2023.

Conference Call

The Company will host a webcast and conference call for investors on Friday, February 28, 2025 at 8:00 AM (ET) to discuss its full year and fourth quarter 2024 financial results and other matters relating to the Company. The webcast and conference call will consist of brief remarks followed by a question and answer session.

The dial-in number for the call is (800) 225-9448 in the U.S. and (203) 518-9708 from outside the U.S. The conference call code is MBIAQ424. A live webcast of the conference call will also be accessible on www.mbia.com.

A replay of the conference call will become available approximately two hours after the completion of the call and will remain available until 11:59 p.m. on March 7 by

dialing (800) 723-6062 in the U.S. or (402) 220-2665 from outside the U.S. In addition, a recorded replay of the call will become available on the Company's website approximately two hours after the completion of the call.

Forward-Looking Statements

This release includes statements that are not historical or current facts and are "forward-looking statements" made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The words "believe," "anticipate," "project," "plan," "expect," "estimate," "intend," "will," "will likely result," "looking forward," or "will continue," and similar expressions identify forward-looking statements. These statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those presently anticipated or projected, including, among other factors, the possibility that MBIA Inc. or National will experience increased credit losses or impairments on public finance obligations issued by state, local and territorial governments and finance authorities that are experiencing unprecedented fiscal stress; the possibility that loss reserve estimates are not adequate to cover potential claims; MBIA Inc.'s or National's ability to fully implement their strategic plan; and changes in general economic and competitive conditions. These and other factors that could affect financial performance or could cause actual results to differ materially from estimates contained in or underlying MBIA Inc.'s or National's forward-looking statements are discussed under the "Risk Factors" section in MBIA Inc.'s most recent Annual Report on Form 10-K and Quarterly Report on Form 10-Q, which may be updated or amended in MBIA Inc.'s subsequent filings with the Securities and Exchange Commission. MBIA Inc. and National caution readers not to place undue reliance on any such forward-looking statements, which speak only to their respective dates. National and MBIA Inc. undertake no obligation to publicly correct or update any forward-looking statement if it later becomes aware that such result is not likely to be achieved.

MBIA Inc., headquartered in Purchase, New York is a holding company whose subsidiaries provide financial guarantee insurance for the public and structured finance markets. Please visit MBIA's website at www.mbia.com.

Explanation of Non-GAAP Financial Measures

The following are explanations of why the Company believes that the non-GAAP financial measures used in this press release, which serve to supplement GAAP information, are meaningful to investors.

Adjusted Net Income (Loss): Adjusted Net Income (Loss) is a useful measurement of performance because it measures income from the Company excluding its international and structured finance insurance segment, comprising the results of MBIA Corp. which given its capital structure and business prospects, we do not expect its financial performance to have a material impact on MBIA Inc. Also excluded from Adjusted Net Income (Loss) are investment portfolio realized gains and losses, gains and losses on financial instruments at fair value and foreign exchange, and realized gains and losses on extinguishment of debt. Adjusted Net Income (Loss) eliminates the tax provision (benefit) as a result of a full valuation allowance against the Company's net deferred tax asset. Trends in the underlying profitability of the

Company's businesses can be more clearly identified without the fluctuating effects of the excluded items previously noted. Adjusted Net Income (Loss) as defined by the Company does not include all revenues and expenses required by GAAP. Adjusted Net Income (Loss) is not a substitute for and should not be viewed in isolation from GAAP net income.

Adjusted Net Income (Loss) per share represents that amount of Adjusted Net Income (Loss) allocated to each fully diluted weighted-average common share outstanding for the measurement period.

MBIA management further adjusts Adjusted Net Income (Loss) and Adjusted Net Income (Loss) per share by removing the impact of our U.S. public finance insurance segment VIE consolidations. GAAP requires the Company to consolidate certain VIEs that have issued debt obligations insured by the Company. However, since the Company does not own such VIEs, management uses certain measures that remove the impact of VIE consolidations for our U.S. public finance insurance segment in order to reflect financial exposure limited to its financial guaranty contracts.

Book Value adjustments: Management adjusts GAAP book value to remove the book value of MBIA Corp. and for certain items which the Company believes will reverse from GAAP book value through GAAP earnings and comprehensive income, as well as add in the impact of certain items which the Company believes will be realized in GAAP book value in future periods. The Company has limited such adjustments to those items that it deems to be important when measuring financial performance and for which the likelihood and amount can be reasonably estimated. The following provides a description of management's adjustments to GAAP book value:

- *Negative book value of MBIA Corp.* - We remove the negative book value of MBIA Corp. based on our view that given MBIA Corp.'s current financial condition, the regulatory regime in which it operates, the priority given to its policyholders, surplus note holders and preferred stock holders with respect to the distribution of assets, and its legal structure, it is not and will not likely be in a position to upstream any economic benefit to MBIA Inc. Further, MBIA Inc. does not face any material financial liability arising from MBIA Corp.
- *Net unrealized (gains) losses on available-for-sale ("AFS") securities excluding MBIA Corp.* - We remove net unrealized gains and losses on AFS securities recorded in accumulated other comprehensive income since they will reverse from GAAP book value when such securities mature. Gains and losses from sales and impairment of AFS securities are recorded in book value through earnings.
- *Net unearned revenue in excess of expected losses of National* - We include net unearned premium revenue in excess of expected losses. Net unearned premium revenue in excess of expected losses consists of the financial guarantee unearned premium revenue of National in excess of expected insurance losses, net of reinsurance and deferred acquisition costs. In

accordance with GAAP, a loss reserve on a financial guarantee policy is only recorded when expected losses exceed the amount of unearned premium revenue recorded for that policy. As a result, we only add to GAAP book value the amount of unearned premium revenue in excess of expected losses for each policy in order to reflect the full amount of our expected losses. The Company's net unearned premium revenue will be recognized in GAAP book value in future periods, however, actual amounts could differ from estimated amounts due to such factors as credit defaults and policy terminations, among others.

Claims-paying Resources (CPR): CPR is a key measure of the resources available to National and MBIA Corp. to pay claims under their respective insurance policies. CPR consists of total financial resources and reserves calculated on a statutory basis. CPR has been a common measure used by financial guarantee insurance companies to report and compare resources and continues to be used by MBIA's management to evaluate changes in such resources. The Company has provided CPR to allow investors and analysts to evaluate National and MBIA Corp. using the same measure that MBIA's management uses to evaluate their resources to pay claims under their respective insurance policies. There is no directly comparable GAAP measure.

Leverage Ratio: Gross Par Outstanding divided by Statutory Capital (Policyholders' Surplus plus Contingency Reserve).
